

Amendment 14

Date of amendment: 11 January, 2018

Protocol change: Men with PSA elevated twice who follow the protocol and not have been diagnosed with cancer change from a 2 year interval to a 4 year interval.

This amendment is replaced by amendment 15 after 9 January, 2023. Men who have been scheduled for a 4 year interval and have less than 2 years since last PSA test will follow the new algorithm stated in amendment 15, while men with more than 2 years since last follow-up will stick to the 4 year interval
