

Amendment 2:3

Date of amendment: 13 January, 2025

Protocol change: Up to 13 January 2025 men in the screening group were allocated to Arm 1, 2 or 3 at the date they had a PSA test according to a rolling schedule: arm 1, arm 2, arm 3, arm 1, arm 2,... Hence men in the screening group who had not yet had any PSA test did not belong to any arm and did not have any value in column ArmID in the Participant table. At 13 January 2025 these men were ordered according to their participantID and then allocated to arm 1, arm 2, arm 3, arm 1, arm 2.... This was recorded in ArmID in the Participant table. Men who had died, emigrated or had a PC diagnose before 13 January 2025 (also before their randomisation date) were also allocated to an arm.
